COMPANY OVERVIEW

RD&T Consulting Inc. delivers end-to-end software solutions, encompassing full-lifecycle development—from design and build to deployment and maintenance—anchored by a comprehensive Secure Software Development Lifecycle. The firm conducts in-depth application security architecture and code reviews, utilizing Static (SAST), Dynamic (DAST), and Software Composition Analysis (SCA) tools to identify and remediate vulnerabilities. Its quality assurance practice spans manual and automated testing—functional, regression, and Section 508 accessibility—to guarantee reliable, accessible software. By integrating DevSecOps pipelines and embedding security into CI/CD workflows, RD&T ensures continuous risk-based vulnerability management and remediation. With over 30 years of IT experience and deep alignment with NIST, FISMA, and FedRAMP standards, the company crafts scalable, compliant solutions that enhance performance and safeguard mission-critical systems.

CORE COMPETENCIES

- Full-Lifecycle Software Development (Design, Build, Deploy, Maintain)
- Application Security Architecture & Code Reviews
- Secure Software Development Lifecycle (SSDLC) Implementation
- Static (SAST), Dynamic (DAST), & Software Composition Analysis (SCA)
- Quality Assurance Testing (Manual & Automated, Functional, Regression, Section 508)
- DevSecOps Pipeline Integration & CI/CD Security
- Risk-based Vulnerability Management & Remediation
- Compliance Readiness for NIST, FISMA, FedRAMP, & Section 508

DIFFERENTIATORS

RD&T Consulting Inc. combines over 30 years of veteran-driven IT experience with specialized expertise in software development, cybersecurity, and quality assurance. Its team leverages industry-leading tools—SonarQube, Checkmarx, and Black Duck for code analysis; Jenkins for CI/CD orchestration; Selenium and TestComplete for automated testing; and Contrast for runtime security—to deliver hardened, high-performing applications. Deep, hands-on knowledge of NIST, FISMA, and FedRAMP standards underpins every engagement, ensuring solutions are built from the ground up with secure coding practices, robust governance, and automated vulnerability management. An agile, collaborative team structure drives continuous program improvement, allowing RD&T to rapidly adapt to evolving security threats and optimize mission-critical systems.
